

# MES Garden 4-H SPIN Club

University of Hawaii at Manoa | College of Tropical Agriculture and Human Resources | Cooperative Extension Service

**Have fun and learn something new!**

Youth will learn about a broad range of horticultural and environmental education topics. Science process skills, observation, taking measurements, and problem solving are naturally integrated into the activities through both group and individual learning experiences. All activities are correlated to academic standards for science, math, language arts, and social studies. Youth will also learn to maintain the plants in the garden through regular watering and removal of weeds.

Youth can get involved in exploring their world through meaningful activities that encourage leadership development, personal pride and responsibility, and community involvement. Youth involved in the program develop critical thinking skills, and the ability to identify community concerns and take action to address them through individual group projects. (For 4<sup>th</sup> – 6<sup>th</sup> graders)

**Location: Moanalua Elementary School**

**Dates: Fridays**

**September 13, 27; October 4, 18;**

**November 1, 22; and December 6, 13**
